PLACE FOR A SEAL

IN A FAIRYTALE – LIKE ŁÓDŹ

Authors: Małgorzata Krakowiak and Marta Gadula Translator: Justyna Żuraw Welcome young adventure-seekers, parents and teachers! We will introduce you to several fairytale monuments.

In Studio of Small Film Forms thousands of animations were created,

Se-ma-for Studio for many young viewers once made them.

Ask your parents if they still remember

any of their favourite fairytales' members.

Let them look for them in their memory...

Today the map in the quest will show us the way

and places where the monuments of the film heroes stand we will be able to say.

On the route a pen and colored pencils will be needed,

thanks to them the stories will be colourful - I really mean it.

Once all your journey will be fulfilled,

gaps in the text of the quest can be filled.

You should write down your password there, hunting for the letters with digits without fear. The password will be created at the end, thanks to it – the treasure to you will be present. And when you see the icon in the text, a photo with a film hero you must take next. Along the way many pleasant places can be found,

if only you want to spend here some more time.

POINT 1

In front of us, in Piotrkowska street, the first figure is located, as a city tourist to us it is presented.

This nice fellow, to all Polish children well-known, in the evenings' fairytales on TV was shown.

Before the famous bear was made real on the screen,

Czesław Janczarski created him in the books with his team.

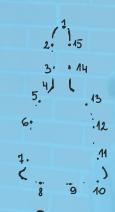

Good morning, my name is Miś Uszatek!
On a fairytale route I will take you today.
My _ _ 1_ (which?) ear has drooped,
my paw showing a special gesture.
In the other paw,
I keep the plan of this city,
on the cover of which there
is an inscription – that is witty!
(In English it means: I like Łódź)

POINT 2

At the end of Sienkiewicza Park second playground is located in front of it another fairytale hero is situated. It's a plasticine man – who by a small girl was created, in the book of Maria Kownacka: "Plastusiowy pamiętnik" it has been presented.

Hello, my dear!
My name is Plastuś
– look what I have here.
In my 2 _ G _ 3 (which?) hand this object can be found, when you join the numbers you can say its name out loud.
This _ 4 _ _ (name of the thing) at schools used to be employed, and in my fairytale, as an alarm clock – oh, those can make me annoyed!

POINT 3

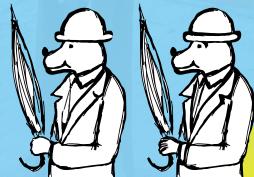

We have walked a long way from Plastuś lovely figure, on the corner of Galeria Łódzka at Piłsudskiego we are – and still eager. Nearby an elegant gentleman we are looking for. Who is he – we will soon get to know! Ludwik Jerzy Kern, born in Łódź, this character created and Se-ma-for a TV series for children about him invented.

Welcome my dear guests, it's time to introduce myself, my name is Ferdynand Wspaniały.

I'm wearing a suit and a (under the neck) 6 5 _ _ _ _ believe me that's not a lie.

Always be elegant that is my tip _ now help me, please, a little bit.

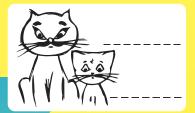

In my portraits find 5 differences and give some interesting colors not only to the face.

POINT 4

Now towards Targowa street off we go, two animals next to the museum we may look for. One of them walks on a high grey wall, some fun with his brother he is looking for ... These two cats in the stories of Marek Nejman first appeared, then on TV screens to the children's eyes they really appealed.

Welcome, welcome my sweet guests!
Many interesting stories both of us nest.
A good deed you will do,
by putting our names in the picture without further ado.
Museum of Cinematography is nearby,
stories of many films can there be found,
knowing them you will be really proud.

POINT 5

Further East along the buildings you will pass, the last point of the quest is indeed a must.

When the Palm House is there at your sight, a small sparrow you will find.

If you look around yourself attentively, the bronze leaves on the ground you will find.

On the leaves under the bird the title of the fairytale is saved. Enter it here: PRZYGÓD _ _ 7 _ 8 WRÓBLA _ _ 9 _ _ 10 _ _ the full name of a fairy tale is now for you revealed.

Welcome my dear friends!

Wandering around the world I have lost my colors, but I did not lose my faith to regain them all.

Will you help me have my colors back, to be beautiful and happy from the bottom to the neck?

My belly and head are in a nice shade of gray and my back is orange as they used to say.

Where in the drawing you can see the dots, color them black – that's a really good thought.

The beak is there to be coloured – my dear lovely fellow, in this place of my body, please, use simply yellow.

The number of my feathers below should be written down:

on the tail,

on both wings,

look carefully at the monument and this information will easily be found. If the numbers are already known to you, mathematical puzzles will be solved too.

Now in a beautiful park look for a Gardener's House,

— TUBAJKA café there is with many delicacies at a small price.

Give the password at the counter before a well-deserved sweet rest, then the prize you will find in a very small chest.

And if correct numbers of sparrow's feathers you can recall you will open the treasure with the seal

— and that's your ultimate goal.
